WE KNOW THE MILL LINING BUSINESS... INSIDE AND OUT

Complete in-plant facilities ensure total control over the design and manufacture of the product from computer assisted application design to the rubber compound that is formulated and tested prior to molding. The result is a product whose quality has been proven in numerous installations to enhance efficiency and service at competitive costs.

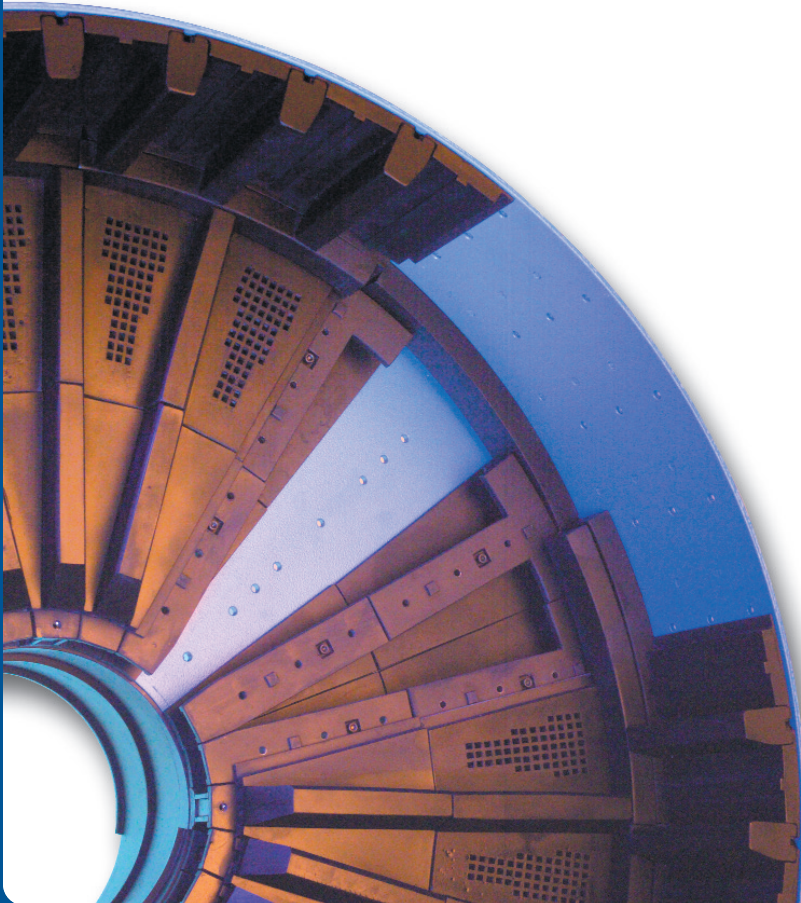

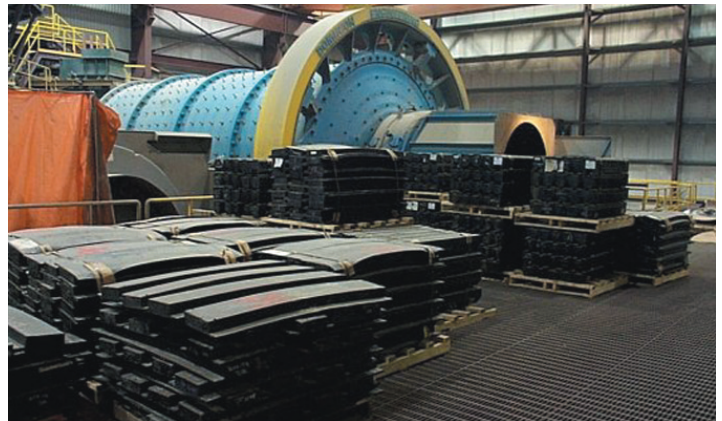

Polycorp Rubber Mill Liners have demonstrated the following benefits from ball mills to autogenous grinding applications.

- Reduced liner costs per ton of material processed.
- Longer lining life and fewer maintenance interruptions.

Compared to metal liners these additional benefits have been realized.

- Faster and safer installations.
- Lower operating noise.
- Lining weight reductions by as much as 80%.

Polycorp is ISO 9001-2000 Registered and has the technology and manufacturing systems in place to identify each project's requirements and produce rubber solutions with optimum quality, cost and delivery.

Rubber Mill Liners
Rubber Grates
Discharge Cones
Pulp Lifters
Combination Liners
