

Global Focus

The Polycorp brand represents decades of proven product performance, field service and customer support.

Geographic expansion has been successfully pursued, with 200 employees and over 50 agents and distributors located around the world, servicing every continent.

Polycorp's strategy is to identify, develop and pursue elastomeric based products in niche markets where our material, technical and engineering capabilities help customers mitigate risks associated with impact, corrosion, abrasion, noise, and vibration in the Transportation, Mining and Protective Linings sectors.

Once a product line is established as the North American market leader, we use this platform for product line extension, and geographic expansion.

Polycorp has experienced growth of over 100% in each division since 2007, driven by exports in excess of 75%

Recent successes:

- **Transportation:** Australia, New Zealand & Netherlands
- **Mining:** Mali, Mongolia & Russia
- **Protective Linings:** Middle East, Brazil & Morocco
